PROFESSIONAL SUMMARY

Results-driven MCA student and MERN Stack Developer with 1 year of hands-on experience designing and deploying scalable full-stack web applications. Proficient in Node.js, Express.js, React, and MongoDB with a strong foundation in RESTful API design, JWT authentication, database optimization, and cloud integrations. Actively improving Data Structures & Algorithms skills and seeking an entry-level software development role to deliver impactful solutions.

PROFESSIONAL EXPERIENCE

ProBey Services *November 2025 – September 2026*

Full Stack Developer

HRMS (Human Resource Management System)

- Designed and developed the Payroll Management module end-to-end, automating salary computation, deductions, and payslip generation to replace error-prone manual processing.
- Built the Leave Management module, covering leave application, multi-level approval workflows, and real-time leave-balance tracking for employees and managers.
- Implemented role-based dashboards so employees, managers, and HR admins each get views and permissions tailored to their responsibilities.
- Worked closely with HR stakeholders to translate business requirements into scalable backend logic and clean, maintainable APIs.

Career Portal

- Analyzed and optimized MongoDB schemas, indexes, and query patterns to reduce response times and improve performance under increasing data volume.
- Designed and built an AI-powered resume parsing pipeline using the Google API, automatically extracting candidate skills, experience, and education into structured profiles for recruiters.
- Developed RESTful APIs to support job postings, candidate applications, and recruiter workflows across the portal.
- Applied caching and query optimization techniques to keep the platform responsive as the candidate and job-listing base grew.

EVOS

- Built interactive, responsive frontend interfaces in React, converting UI/UX designs into reusable, component-based architecture for a smooth experience across devices.
- Coordinated with designers and backend engineers to integrate frontend components with REST APIs, ensuring a seamless end-to-end flow.

PROJECT EXPERIENCE

DevTinder

Node.js · Express.js · React · MongoDB · JWT · bcrypt · Amazon SES · Socket.io · WebSockets

- Developed a MERN stack platform enabling developers to connect, collaborate, and network, with secure JWT-based authentication and bcrypt password hashing.
- Designed core features including user profiles, connection requests, and an intelligent matching system, backed by scalable RESTful APIs.
- Implemented real-time chat using Socket.io and WebSockets, plus automated email notifications via Amazon SES.

Music Streaming Application

Node.js · Express.js · MongoDB · React · ImageKit · Multer

- Developed backend APIs for music upload, album creation, and user management, with JWT authentication and role-based authorization.
- Designed REST APIs for login, registration, and end-to-end content management, using MongoDB with Mongoose ODM.
- Integrated ImageKit cloud storage and Multer middleware for efficient file upload handling.

EDUCATION

Master of Computer Applications (MCA) — Galgotias University Completed 2024-26 | CGPA: 7.1

Bachelor of Computer Applications (BCA) — YMCA Completed | CGPA: 7.1

12th – CBSE Board 67%

10th – CBSE Board 63%

TECHNICAL SKILLS

Frontend: ReactJS, HTML5, CSS3

Backend: Node.js, Express.js

Programming Languages: JavaScript (ES6+), Java (Core), Python

Database: MongoDB, Mongoose ODM

Concepts: Data Structures & Algorithms, REST APIs, JWT Authentication, Role-Based Access Control, Database Optimization

Tools & Platforms: Git, GitHub, Amazon SES, ImageKit, Multer, bcrypt, Socket.io, Google API
